more details!**

What is the "Internships in Japan for AI and Tech Talent" Program?

The "Internships in Japan for AI and Tech Talent" program aims to promote diversity in the recruitment of IT talent for Japanese companies and Japanese-affiliated companies. The program also creates opportunities for interns from ODA recipient countries (as per the DAC List of ODA Recipients) to learn various technical and professional skills at Japanese companies. The organizer will arrange all the necessary equipment and cover any required travel and accommodation expenses.

Who is eligible?

- Must be expected to graduate from, or have graduated from, a university, junior college, technical college, or a higher education institution.
- For those who have already graduated, the graduation must have occurred within the past three years.

What are the 3 key features of the program?

01 Discover Japanese companies that eagerly welcome tech talent from overseas

This government approved internship program is sponsored and implemented by Japan's Ministry of Economy, Trade and Industry. It offers opportunities to meet Japanese companies willing to employ foreign human Resources.

02 Travel, lodging, and language support for traveling to Japan

The administration office will handle the entry visa procedures required for participation in the internship, as well as airline tickets and accommodations.

Subsidies are also offered to cover the cost of accommodation during your stay in Japan. Full travel support is also provided with assistance available in English.

03 Internships utilizing English

This is a great opportunity to gain new experience and grow your skills through an internship at a leading, growing, global tech company in Japan.
