

# **FIC-TEC**

INTERNATIONAL FAIR  
OF SCIENCE AND TECHNOLOGY

Science and technology  
at the service of the peoples

Polyhedron of Caracas

from 30 November until 3 December 2017

# Objectives

- **Project and capture** investments that contribute to the creation of new industries, which allow us to create mechanisms to substitute imports of consumer goods and boost national production.
- **Guarantee** the participation of more than 300 national and international exhibitors in an area of 5,000 square meters of exhibition.
- **Visualize** the installed potential and capacities with which our country counts on Science and Technology.

- **Evidence** that the Bolivarian Revolution has countries and allied companies throughout the world, and that they continue to invest in our country and bet on the success of fraternal cooperation.

- **Give** scientific and technological support to the processes of generating chains of value to our primary wealth.

- **Update** our industrial technological platform, which will allow to make our productive processes more efficient, underpinning the productive engines of the Bolivarian economic agenda.

- **Promote** the rapprochement between the actors (suppliers and customers) in the scientific technological development.

- **Effectively disseminate** our technological scientific capabilities, allowing the rapprochement between the public and private sectors.
- **Broadcast** the scientific technological advances of the agreements of international cooperation that the Venezuelan State has achieved.
- **Encourage** the meeting, through a business round table, to make feasible proposals in science and technology that allows us to encourage programs of development and industrial scale-up of prototypes.

# Special Features of the Event

- The Fair would have a didactic recreational space, destined to the infantile interaction/development in the scientific and technological field.
- The external spaces of the fair will serve to display the big products that wish to appear.
- There will be space for Forums and Conference with capacity for 150 attendees.

- An area will be designated for the exhibition of products and services developed with the strategic allies of the Bolivarian Revolution.
- It aims to consolidate a national system of Scientific and Technological Fairs (FICTec) that serve as a platform to direct outlines of scientific research, depending on the specific needs of the country.
